

iPhone Passwords

To set up MFA in the iPhone Passwords app, you need an iPhone that supports iOS 18 or later.

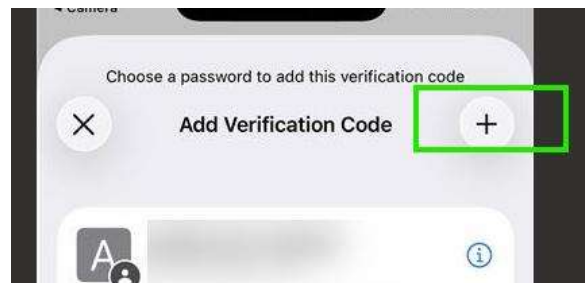

Step 1 – Open your camera and scan the QR code generated by 1Chart.

Step 2 – A pop-up will appear on your phone to add the verification code in 'Passwords'. Tap on it.

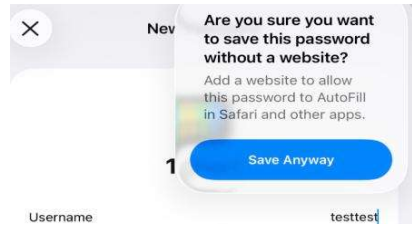

Step 3 – You will see the screen below click on +

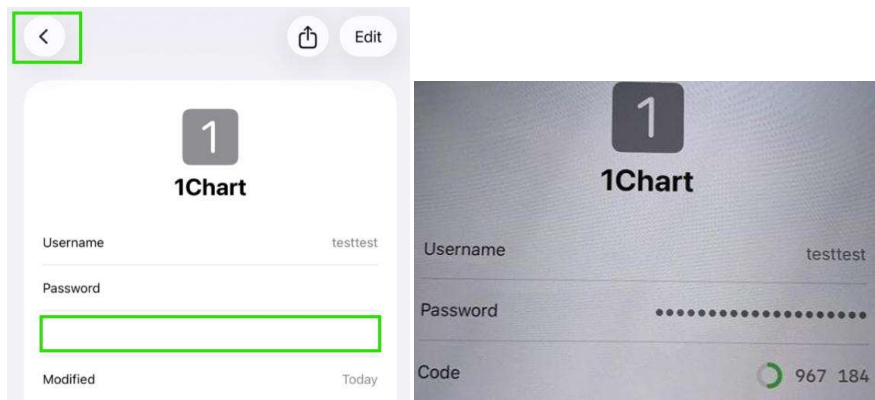

Step 3 – Add a name to the title and tap the blue checkmark at the top right of your screen.

Step 4 – A pop-up will ask if you want to save without the website. Click 'Save Anyway'.

Step 5 – It will save and generate a code, which will appear under your password. Tap the back arrow twice at the top left of your screen.

Step 6 – You'll return to the screen below. Click on 'Codes' to see your 6-digit code. Find the name you saved it with and enter the code. (It changes every 30 seconds.) Keep this code private.
